

## TAKE 5! MINI CANVAS ALBUM - BONUS TAGS

For our students that have taken the Take 5! Canvas Mini Album class this spring at our various events, we have a couple of bonus canvas tags for you to make out of some of the supplies you have left over from the Take 5! Kit! We love to stretch our leftovers to make fun little extras you can use on a card or a scrapbook page!

With just a few items from your own stash, a little bit of patterned paper and cardstock and some punches you will have 2 fun canvas tags to use on your next project!

### LUV U TAG:

- Cut printed canvas to 4" x 5½" and trim into a tag. Fray edges of the tag using the tip of your scissors or a needle.
- Cut 4" x ¾" green cardstock and punch with a border punch of your choice. Adhere across the bottom of the tag.
- Cut 4" x 2" of striped patterned paper of your choice and adhere above green cardstock border.
- Punch 2 matching heart punches from a double sided, coordinating piece of patterned paper. Fold one heart punch in half and adhere the right side of heart to the right side of the flat heart punch. Adhere hearts along the right side of the canvas tag. Allow hearts to hang off the right side slightly and trim flush with the side of the canvas.
- Behind the heart flap on the left side of the flat heart punch, use leftover alpha die cuts to spell "LUV U".
- Take a small manila tag and tuck behind the striped patterned paper along the left side of the canvas tag. Stamp manila tag with a stamp of your choice. Remove the white string from the top of the manila tag and tie with a coordinating ribbon of your choice.
- Take white string and wrap it around the tag at the bottom of the striped patterned paper and tie in a knot on the front.
- Add clear rhinestones along the bottom edge of the striped patterned paper.
- Poke a hole in the top of the canvas tag and insert a large metal brad.

## HI TAG:

- Cut printed canvas to 4" x 5½". Fray edges of the tag using the tip of your scissors or a needle. Fold bottom of canvas up about 1½". Adhere along sides ONLY. This forms a little pocket at the bottom.
- Cut 4" x ¾" turquoise cardstock and punch with a border punch of your choice. Adhere across the top of the "pocket".
- Punch a tab punch from yellow cardstock and adhere to upper left corner. *If you don't have a tab punch, cut a rectangular shape from cardstock and staple to the top of the canvas tag to form a tab.*
- With leftover alpha die cut letters, spell "HI" on top of yellow tab punch.
- Cut 2½" x 2" patterned paper of your choice. Trim into a tag. Punch a hole at the top and tie with a coordinating ribbon.
- Cut 2" x 3" coordinating patterned paper of your choice. Trim into a tag. Poke a hole at the top and insert a large metal brad.
- Punch a small flower from yellow cardstock and adhere to the center of a small white marking tag. Adhere a small clear rhinestone in center of yellow flower punch.
- Loop white string in small white marking tag around brad in the top of the tag and allow it to hang from the brad.
- Insert tags into the pocket.
